

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): An electronic device, comprising:

a display, wherein an image is displayable on said display; and
a navigation sensor, whereby a movement of said electronic device relative to a surface in close proximity to said navigation sensor is sensed by said navigation sensor and said movement includes moving said display and said movement produces a change in said image that is showing on said display; and
a first button, whereby said movement of said electronic device and activation of said first button are operable ~~may be operated~~ in cooperation to mimic at least one function of a computer mouse being used with a graphical user interface.

Claim 2 (original): The electronic device of claim 1 wherein said change comprises at least moving a cursor.

Claim 3 (original): The electronic device of claim 1 wherein said change comprises at least panning at least part of said image that is showing on said display.

Claim 4 (original): The electronic device of claim 1 wherein said change comprises at least scrolling at least part of said image that is showing on said display.

Claim 5 (original): The electronic device of claim 1 wherein said change comprises at least navigating at least part of said image that is showing on said display.

Claim 6 (cancelled)

Docket No. 10991692-1

Claim 7 (previously presented): The electronic device of claim 1 further comprising:
a second button, whereby said movement of said electronic device, said first button, and said second button may be operated in cooperation to mimic more than one function of a computer mouse being used with a graphical user interface.

Claim 8 (currently amended): An electronic device, comprising:

a display;

a navigation sensor coupled to said display whereby said navigation sensor detects a movement of said electronic device relative to a surface in close proximity to said navigation sensor and said movement includes movement of said display and an image displayed on said display is altered in response to said movement and;

a first button, whereby said movement of said electronic device and activation of said first button are operable ~~may be operated~~ in cooperation to mimic at least one function of a computer mouse being used with a graphical user interface.

Claim 9 (original): The electronic device of claim 8 wherein said image displayed on said display is altered in response to said movement by moving an image of a cursor.

Claim 10 (original): The electronic device of claim 8 wherein said image displayed on said display is altered in response to said movement by panning a second image displayed on at least part of said display.

Claim 11 (original): The electronic device of claim 8 wherein said image displayed on said display is altered in response to said movement by scrolling a second image displayed on at least part of said display.

Claim 12 (original): The electronic device of claim 8 wherein said image displayed on said display is altered in response to said movement by showing a different part of a second image part of which is displayed on at least part of said display.

Claim 13 (cancelled):

Claim 14 (previously presented): The electronic device of claim 8 wherein a graphical user interface is being displayed on said display.

Claim 15 (previously presented): The electronic device of claim 8 further comprising:
a second button, whereby said movement of said electronic device, said first button, and said second button may be operated in cooperation to mimic more than one function of a computer mouse being used with a graphical user interface.

Claim 16 (original): The electronic device of claim 15 wherein a graphical user interface is being displayed on said display.

Claims 17-26 (cancelled)

Claim 27 (original): An electronic scanning device, comprising
an image sensor for scanning an image;
a display that displays a first part of a scanned version of said image,
a navigation sensor that detects relative movement between said scanning device and a surface in close proximity to said navigation sensor whereby said relative movement changes said display to displaying a second part of said scanned version of said image.

Claim 28 (original): The electronic scanning device of claim 27 wherein said relative movement may also move a cursor displayed on said display.

Claim 29 (currently amended): The electronic scanning device of claim 27 wherein said second part of said scanned version of said image is **[[a]]** scrolled in relation to said first part of said scanned version of said image.

Claim 30 (currently amended): The electronic scanning device of claim 27 wherein said second part of said scanned version of said image is [[a]] panned in relation to said first part of said scanned version of said image.

Claim 31 (original): The electronic scanning device of claim 27 wherein said second part of said scanned version of said image is displaced in two directions in relation to said first part of said scanned version of said image.

Claims 32-56 (cancelled)

Claim 57 (new): A method of previewing a scanned image, said method comprising:
displaying a first part of a scanned image;
displaying a second part of said scanned image in response to relative movement between a scanning device and a surface in close proximity to said scanning device.

Claim 58 (new): The method of claim 57 wherein said second part of said scanned image is scrolled in relation to said first part of said scanned image.

Claim 59 (new): The method of claim 57 wherein said second part of said scanned image is panned in relation to said first part of said scanned image.

Claim 60 (new): The method of claim 57 wherein said second part of said scanned image is displaced in two directions in relation to said first part of said scanned image.

Claim 61 (new): An electronic device comprising:
a display located on a first side of said electronic device;
a navigation sensor located on a second side of said electronic device, said second side being opposite said first side, wherein said navigation sensor detects movement of a part of a user relative to said navigation sensor located in close

proximity to said navigation sensor, and wherein an image displayed on said display is altered in response to said movement of said part of said user relative to said navigation device.

Claim 62 (new): The electronic device of claim 61 wherein said image displayed on said display is altered in response to said movement by moving an image of a cursor.

Claim 63 (new): The electronic device of claim 61 wherein said image displayed on said display is altered in response to said movement by panning a second image displayed on at least part of said display.

Claim 64 (new): The electronic device of claim 61 wherein said image displayed on said display is altered in response to said movement by scrolling a second image displayed on at least part of said display.

Claim 65 (new): The electronic device of claim 61 wherein said image displayed on said display is altered in response to said movement by showing a different part of a second image, at least part of which is displayed on at least part of said display.

Claim 66 (new): The electronic device of claim 61 further comprising:
a first button, whereby said movement of said part of said user and said first button may be operated in cooperation to mimic at least one function of a computer mouse being used with a graphical user interface.

Claim 67 (new): The electronic device of claim 66 wherein a graphical user interface is being displayed on said display.

Claim 68 (new): The electronic device of claim 66 further comprising:
a second button, whereby said movement of said part of said user, said first button, and said second button may be operated in cooperation to mimic more than one function of a computer mouse being used with a graphical user interface.

Claim 69 (new): The electronic device of claim 68 wherein a graphical user interface is being displayed on said display.

BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

- ☐ BLACK BORDERS
- ☐ IMAGE CUT OFF AT TOP, BOTTOM OR SIDES
- ☐ FADED TEXT OR DRAWING
- ☐ BLURRED OR ILLEGIBLE TEXT OR DRAWING
- ☐ SKEWED/SLANTED IMAGES
- ☐ COLOR OR BLACK AND WHITE PHOTOGRAPHS
- ☐ GRAY SCALE DOCUMENTS
- ☒ LINES OR MARKS ON ORIGINAL DOCUMENT
- ☐ REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY
- ☐ OTHER: _____

IMAGES ARE BEST AVAILABLE COPY.

As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.
